

Implementation and Harmonization end to end CDISC standard CDASH-SDTM-ADaM in a platform trial framework

Lei Zhang, Senior Clinical Data Engineer, Global Biostatistics & Data Sciences, Boehringer-Ingelheim

Meet the Speaker

Lei Zhang

Title: Senior Clinical Data Engineer

Organization: Boehringer-Ingelheim

Work as a clinical data manager more than 7 years

Focus on Immune Oncology therapy area projects/trials

Start in Pfizer from 2017 to 2021, join Boehringer Ingelheim Global Biostatistics & Data Sciences department from 2021 to present

Engage in the drug development of oncology rare target mutation such as KRAS, MDM2, and DLL3 as clinical data manager

Deep cooperation with biostatistician, statistical programmer during this period, accumulating abundant clinical data standard practical experience

Disclaimer and Disclosures

- *The author(s) have no real or apparent conflicts of interest to report.*

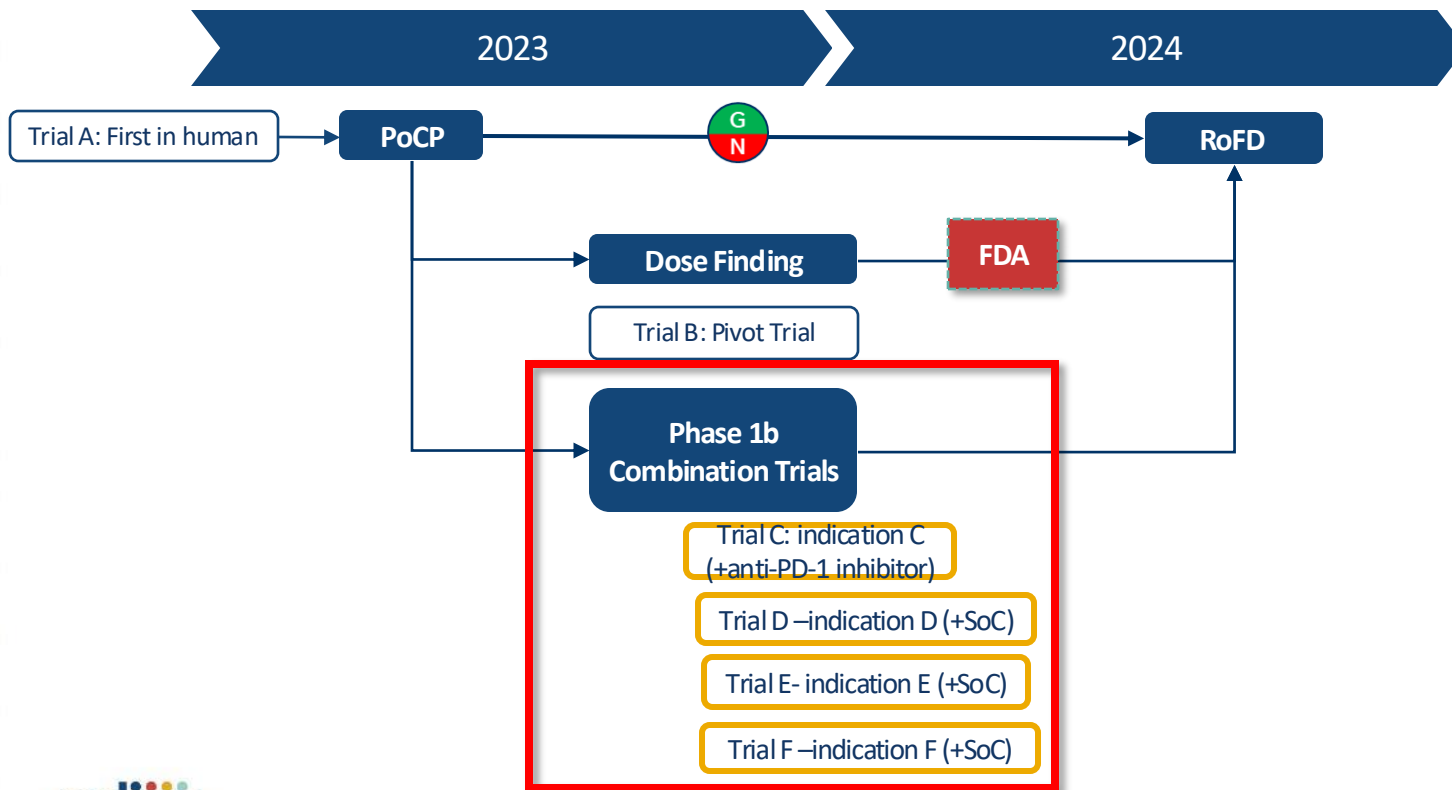

Agenda

1. What's the pain point?
2. Key Highlights in Implementation
3. Practice Makes Perfect

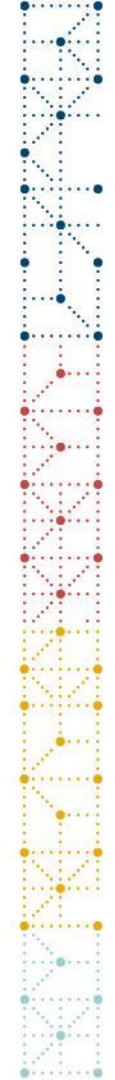

What's the pain point?

Picture of Development

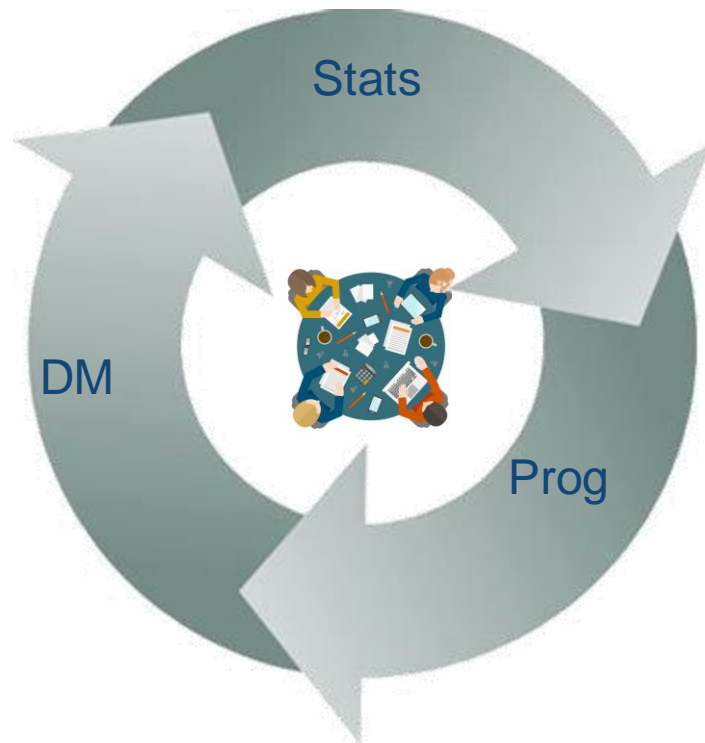

Similarities

- 
- Same candidate drug with different combinations
 - Single master protocol
 - Same MOA
 - Across different tumor types
 - Selected by single marker
 - Similar trial design

Maybe now need a new way...

Work independently

Cooperate within same picture

Key Highlights in Implementation

Key Elements

Collection

DB design
(CRF+ Visit)
Data cleaning

Tabulation

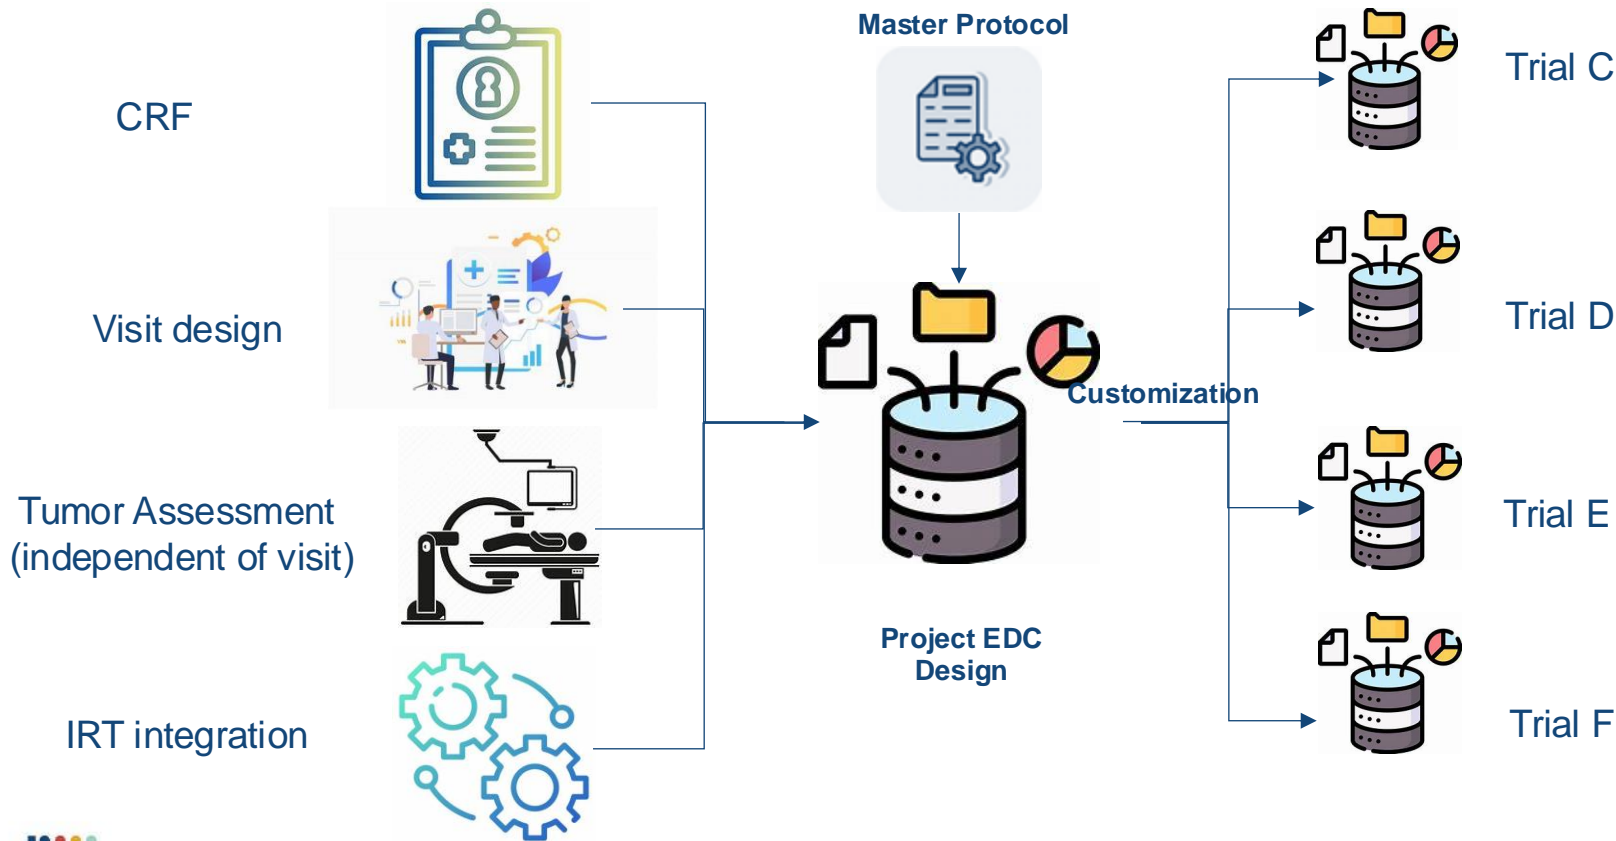

Transformation
Dataset quality review
Project Database
Data Review/Clean Plan
Clinical Quality Review plan

Analysis

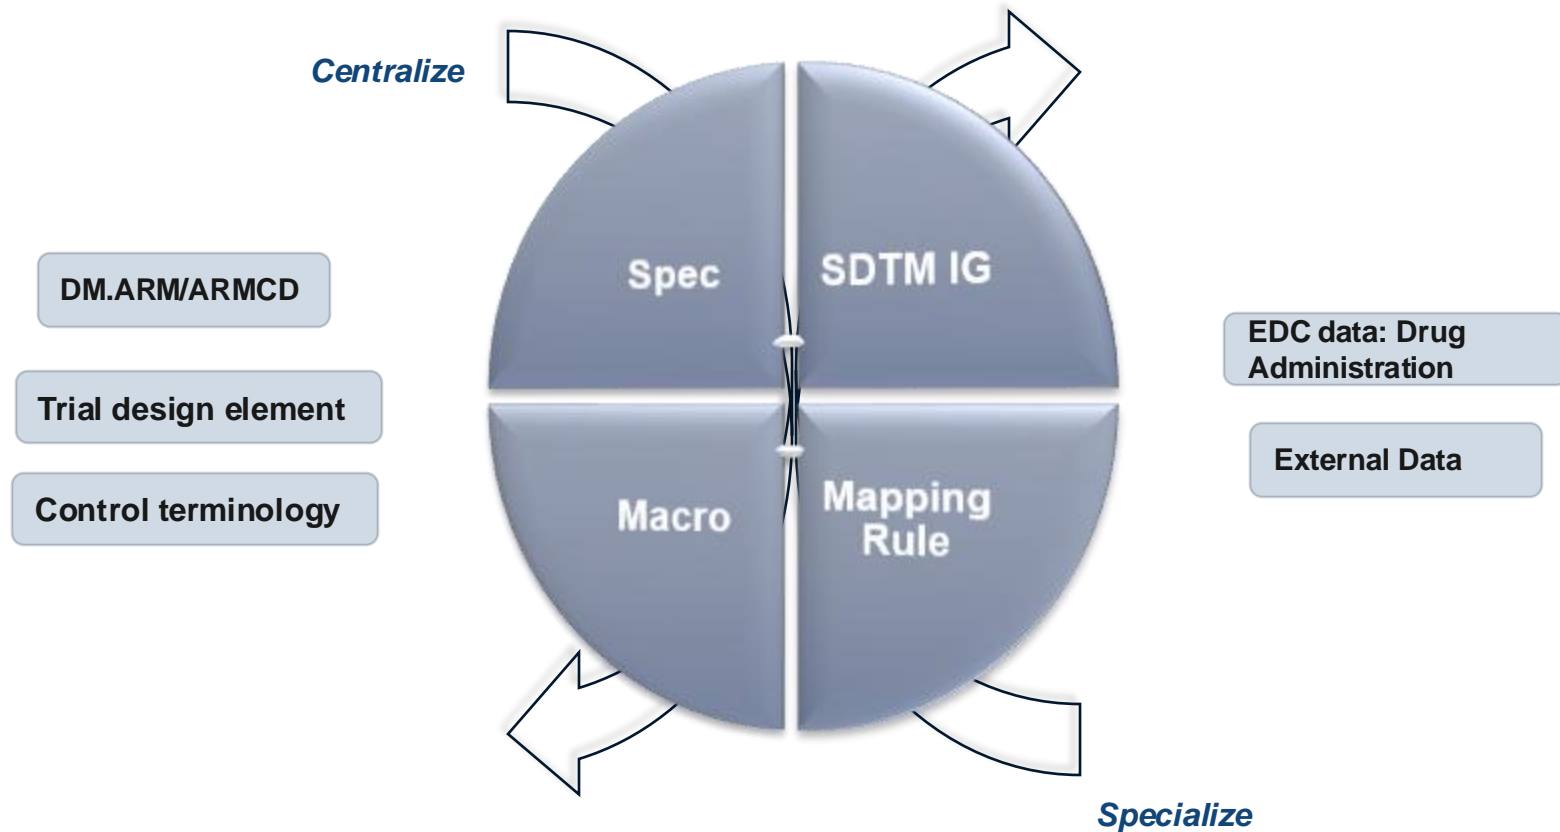

PSAP
PTOC
PDT
Layout of Outputs
PADS-plan
ADS program
TFL program
