360i Program Kickoff Enabling Standards Driven Automation from Study Design Through Results

Realizing the CDISC Vision & Mission

Realizing CDISC's Mission

CDISC's vision is to amplify data's impact to advance research by... creating connected standards across the study information lifecycle to enable accessible, interoperable, and reusable data for more meaningful and effective research

360i: Next Step to Realizing Standards Driven Research

Intelligent protocol-driven research to improve patient outcomes

Science & Innovation

Study Design & Conduct

Study Analysis & Review

Value Of A Connected World

Transition standards use from necessary requirement to valuable enabler through connected and ready to use implementable standards.

Patients

Data that is easier to understand and extract making it more accessible to patients

Sponsors

Protocol driven research automating the metadata & data pipeline reducing time to study results & increasing quality

Regulators

Reduced variability & clickable traceability from analysis to the collected data increasing confidence in decisions

Researchers

Reduce barrier to entry and cost for standards through ready to use implementable standards & open source tools

Technologists

Provide machine readable and interoperable inputs and outputs for easier adoption by software solutions

Harmonization With Industry Ask

Concepts

- *"Align on a standards-agnostic way to represent biomedical concepts used across clinical research and healthcare"*

E2E Standards

- *"Conceptualize standards and solutions from end to end...trial design, collection, tabulation, analysis and reporting"*

Collaboration

- *"Common vision and commitment to accelerate the development of novel data standards...require experts (resource commitment), partnerships, investing in proof of concept"*

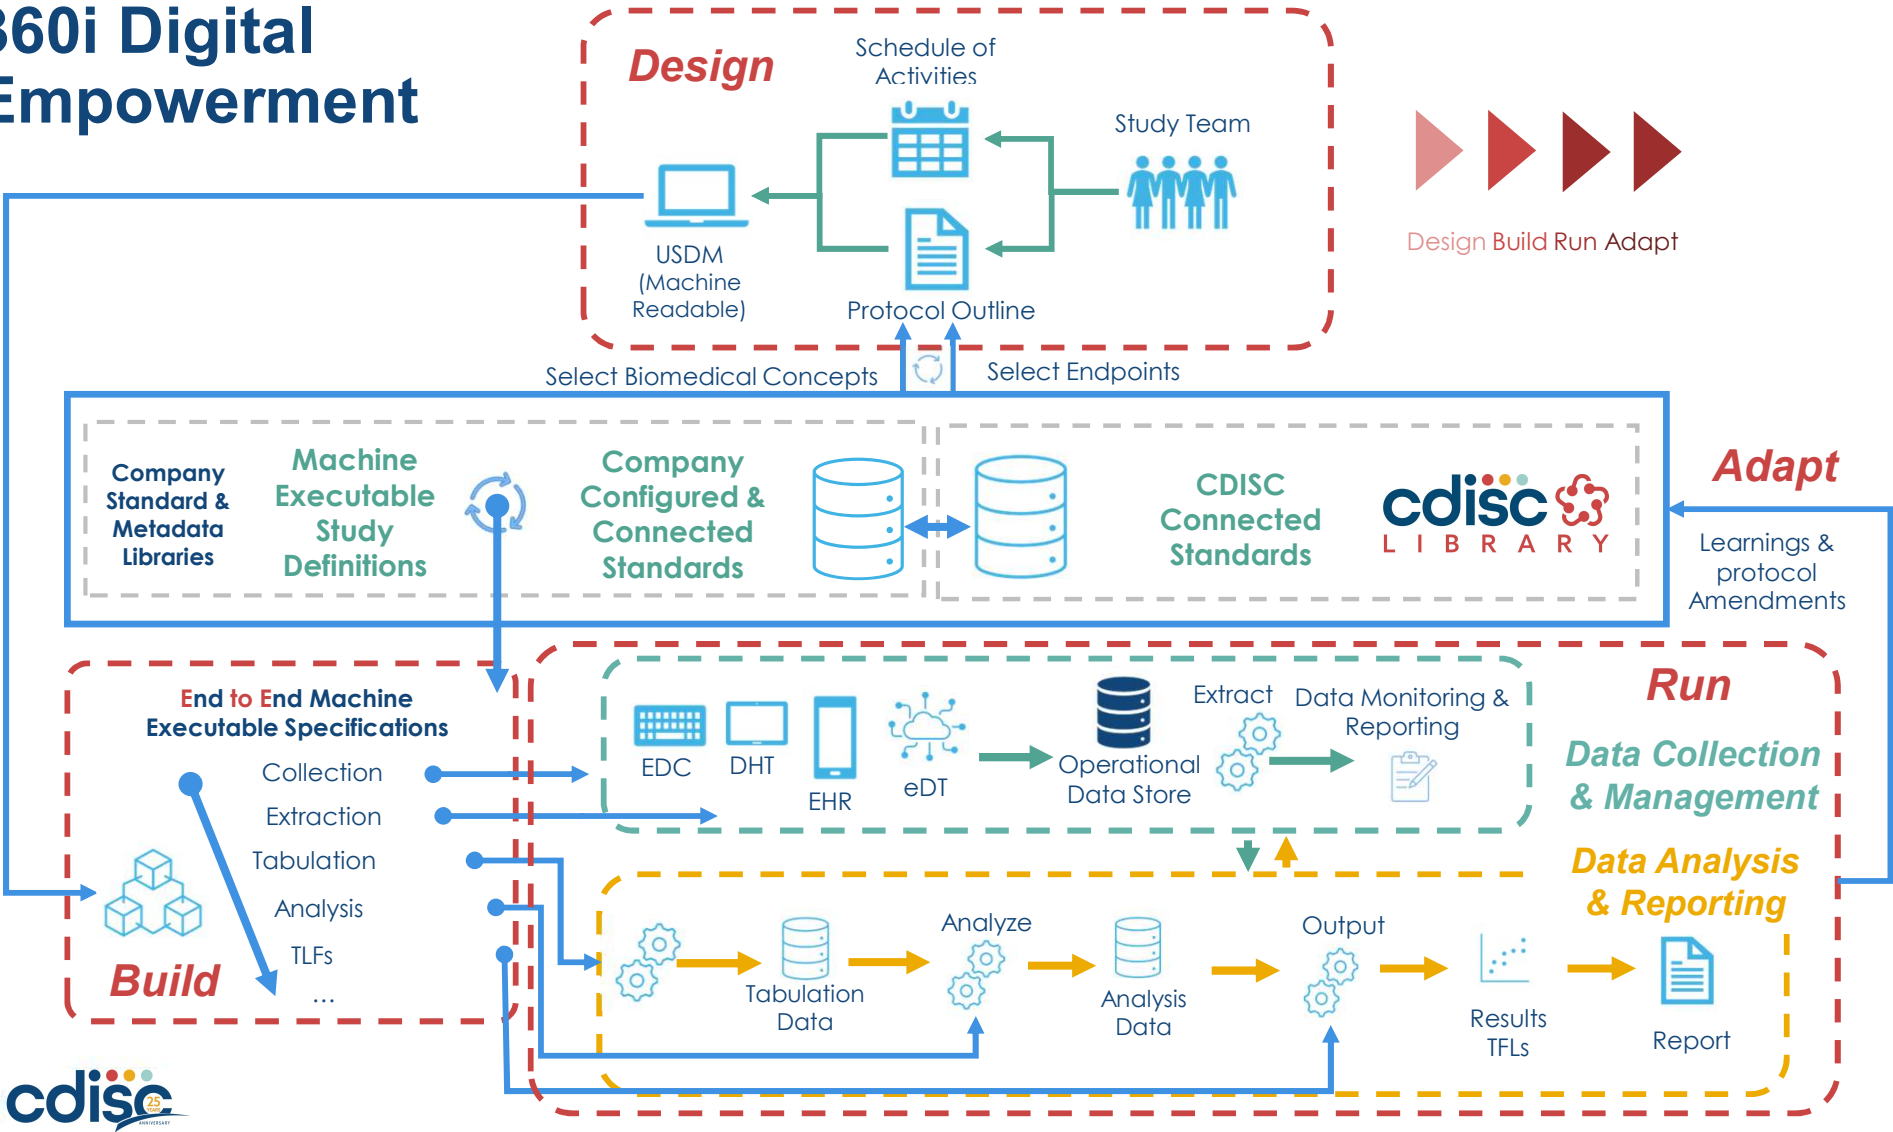

Commitment

- *"Strong collaboration is needed between SDOs, regulators and biopharma representatives"*

Use Cases 360i Can Enable

And many more use cases exist...

The Possibilities Of AI...

Protocol Feasibility

- Extracts study definitions from non-digitized protocols using NLP
- Automated protocol review summary
- Standards: PRM, M11, USDM, and BCs

Business Benefits:
Faster protocol finalization
Reduced amendments
Optimized study design

Data Cleaning

- Analytics automation
- Discrepancy detection (i.e., Missing values, anomalies, gaps in traceability)
- Standards: CDASH, USDM, CT, and BC

Business Benefits:
Improved data quality
Reduced study costs
Better decision-making

Artifact Recommendation

- Analyze protocols, CRFs, SAPs, and historical data to recommend artifacts
- Extract study definitions to recommend previously used metadata/standards
- Standards: all

Business Benefits:
Faster artifact creation
Improved compliance
Better consistency

360i Journey: Ideas → Implementation → Common Practice

Define and digitize E2E standards

Accelerate study design and build through digitized standards

Demonstrate automated data flow from design to analysis

What Will 360i Deliver?

- Linked and executable metadata from study endpoint through analysis
- Includes concepts, rules, & sample data

Standards Packages

- Instructions to build standards packages
- Recipes to implement packages within your processes

Implementation Cookbooks

- Technology enabled example leveraging packages & recipes
- Library of community based open-source tools

Content Scope: Implementing Breadth/Depth of Endpoints

Safety Assessments

- ✓ Demography
- ✓ Death Details
- ✓ Adverse Events
- ✓ Disposition
- ✓ Change from Baseline Labs
- ✓ Vital Signs
- ✓ Drug Induced Liver Injury (DILI)

Questionnaire

- ✓ ADAS-Cog

Digital Measure (DHT)

- ✓ Glucose Monitoring
- ✓ Steps / Movement / Sleep

Efficacy Endpoint Assessments

- ✓ Breast Cancer (RECIST)
- ✓ Alzheimer's Disease

Why This Scope?

- *Leverage what is well known and a set of artifacts already available*
- *Use diverse set of data sources to demonstrate different data pipeline flows*
- *Focused and doable – need to get it right and build the playbook*

360i Study Design

SDTM Conformance

ADaM Conformance

360i Phase 1 Activities

Create connected standards (packages) from study endpoints through SDTM and demonstrate automation

Build and broaden biomedical concepts community to operationalize curation and accelerate content

Establish industry think tank to align on definition and scope of analysis concepts by EOY for implementation in 2026

Deliver on CDISC Open Rules scope, Engine 1.0, and plan for inclusion of conformance rules in all future standards

Continue to partner with TransCelerate and industry to drive digital protocol adoption

Define roadmap and scope for digitizing the Trial Master File (TMF)

Analysis Concepts

- What is an Analysis Concept?
 - Collection of standardized configurable elements & methods that are needed to describe a final output or answer a clinical question
 - Standard definitions in a digital statistical analysis plan
- What is the purpose of an Analysis Concept?
 - Supports configuration and automation of analysis
 - Informs what needs to be collected to answer the clinical question

360i Phase 1: Technology Enabled Standards

What's Changed Since CDISC 360 POC?

New Standards:

- DDF USDM
- Analysis Results Standard
- Biomedical Concepts and Dataset Specializations
- sdtm.oak transformations
- Dataset-JSON for dataset exchange
- Open conformance rules

New Software Tools:

- Open Study Builder
- TLF Designer
- admiral
- CORE
- sdtm.oak
- Dataset-JSON conversion tools
- Other COSA tools
- Other Pharmaverse tools

Software Tools Since CDISC 360 POC*

Study Design	Data Collection	SDTM	ADaM	Define-XML	ARS
Open Study Builder 	odmLib 	sdtm.oak 	admiral 	OpenCST 	siera 
Study Definitions Workbench 	ODM XML Stylesheet 	Dataset-JSON Tools 	Dataset-JSON Tools 	defineR 	cards 
BC Browser 	XMLMAP 	CORE 	carver 	odmLib 	gtsummary 
DDF SDR 	Open Study Builder 	datacutr 	Dataset-JSON Viewers 	Define XSL Stylesheet 	tidyCDISC 

* Examples listed – not a comprehensive listing

What Is A 360i Package?

360i has published a complete pre-configured study package with all the components defined in metadata from study design to submission, test data for the study, and open-source software to run the study data pipeline to generate analysis results

High Level Roadmap

Phase 1

Roadmap does not need to be completed sequentially in all cases

1. Study Design

2. CRFs & eDTs

3. SDTM Define-XML

4. aCRFs

5. Shell Datasets

7. ODS

6. Populate CRFs

9. SDTM Datasets

8. oak.sdtm Algorithms

10. Open Rule Set

11. Conformance Report

Timeline, Team Structure, and How You Can Support 360i!

Phase 1: High Level Roadmap

Kickoff

Scope, methodology, onboarding of industry contributors and program kickoff

Summer Pulse Check

Semi-Automated Pipeline (Protocol – SDTM shell datasets)

Publication

Automated Study Data Pipeline Package

EU Interchange

Manually integrated Pipeline (some automation links)

US Interchange

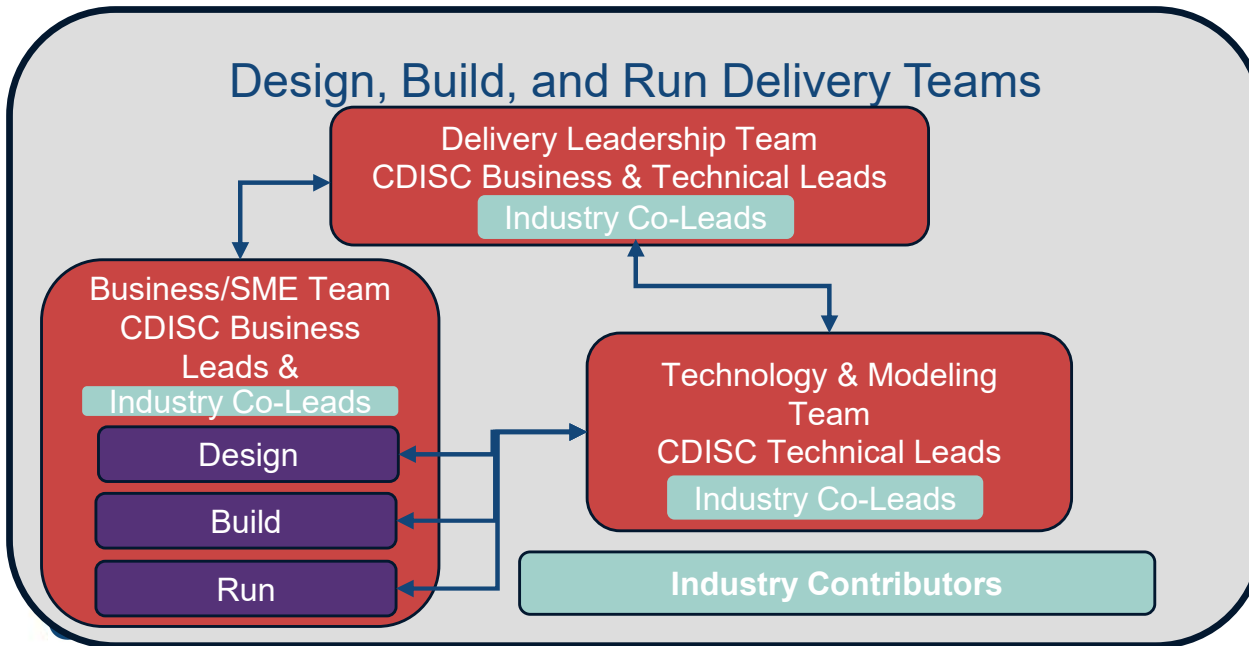

Automated Pipeline (Protocol – SDTM)

360i Operational Team

- ✓ Steer the program
- ✓ Engage the community
- ✓ Deliver on scope
- ✓ Collaborate as integrated team
- ✓ Iterate and solve problems

Parallel Focus Teams

360i Industry Ask: We Need Contributors, Not Observers

Team Co-Leads

- Request 40% commitment for 1 year
- 3 Leads for Business Delivery Team
- 2 Leads for Technical Team
- 2 Leads for each of the focus teams

Team Contributors

- Request 20% commitment committed to one or more teams for 6 month minimum
- Expertise in key areas of the 360i initiative
- Commitment from company to support your contribution

Co-Lead & Contributor Requirements

- ✓ CDISC Member
- ✓ Company commitment over individual commitment
- ✓ Innovative and flexible
- ✓ Collaborative and willing to compromise
- ✓ Hands on keyboards
- ✓ Follow CDISC Core Values:
 - #FullyCommit
 - #FocusOnCommunityNeeds
 - #SolutionsMindset
 - #AccountableForResults
 - #LivetheGoldenRule

CDISC 360i Community Engagement Model

Business Advisory Council

- 6-8 members Meeting Quarterly
- Industry Business/Standards Leaders from CDISC members
- Focus: 360i Strategy and progress Feedback , Business need/process

Technical Advisory Council

- 6-8 members Meeting Quarterly
- Technology Leaders from CDISC members (non-vendors)
- Focus: 360i Strategy and progress Feedback, Technology Roadmap

Technology Vendor Roundtable

- Open meeting quarterly
- CDISC Member Vendors
- Extract Technology Requirements
- 360i Readout & Feedback Sessions

- ✓ Continuous feedback with industry leaders ensuring 360i is pointing in the right direction and aligning with CDISC community needs
- ✓ Members will be selected and serve minimum of 1 year (business and technology committees)
- ✓ Technology roundtable engaging with vendor community to share and gather feedback on whether 360i outputs are meeting vendor needs

Contributor Expertise Desired

Standards

Foundational: CDASH, SDTM, Terminology

Interchange: ODM, Define.xml, and Dataset JSON

Models: USDM, ARS, Open Rules

Business

Business process, change management, study execution

Data management, programming, and analysis

Breast Cancer & Drug-Induced Liver Injury

Technology

Data modeling and biomedical concepts

APIs, Python, R, GitHub

JSON, FHIR, YAML

Next Steps

Webinar

- Share the 360i Roadmap
- Call for Action for team contributors

Kickoff: March

- Assemble contributors
- Define detailed charters
- Kickoff meeting with contributors

CDISC

Interchange: May

- First Milestone: SOA to Specifications for targeted content
- F2F 360i Working meeting to define next iteration

We Need You!

- Be part of the team to drive this forward
- We need committed contributors AND...companies that support the goals
- Click on QR Code below to volunteer
- Make sure to select 360i from the list!

<https://www.cdisc.org/volunteer>

- ✓ Complete CDISC Volunteer Form
- ✓ Complete 360i Contributor Survey

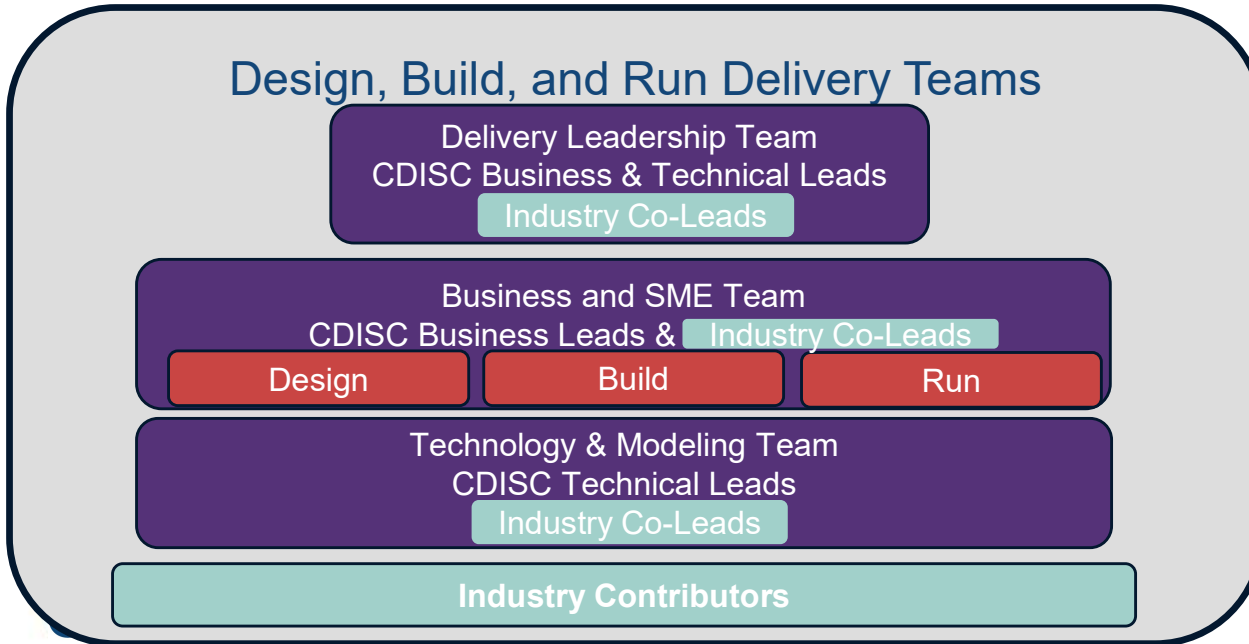

Thank You!

360i Operational Team

- ✓ Steer the program
- ✓ Engage the community
- ✓ Deliver on scope
- ✓ Collaborate as integrated team
- ✓ Iterate and solve problems

Parallel Focus Teams
